

Kent County Council

Job Description: *Biodiversity Officer*

Directorate: Growth, Environment and Transport

Unit/Section: Natural Environment & Coast

Grade: KR9

Responsible to: Senior Biodiversity Officer

Purpose of the Job:

Kent County Council provides professional and independent advice to the majority of the county's planning authorities via the Ecological Advice Service. The service's Biodiversity Officers deliver this service by advising on the ecological implications of development, strategic planning and other proposals and ensuring that the planning authority meets wildlife legislation, policy requirements and duties, and effectively protects, manages and enhances the biodiversity of Kent.

The Environment Act 2021 has resulted in significant change to how biodiversity is dealt with at the local government level. The strengthened Biodiversity Duty now requires all public authorities to not only consider what they can do to conserve and enhance biodiversity but also agree policies and specific objectives, and act to deliver these. Furthermore, this is backed by the requirement to prepare and publish a biodiversity report.

The Act has also introduced Local Nature Recovery Strategies (LNRS), spatial strategies that identify our most valuable existing areas for nature, and areas which have the potential to offer the greatest benefits to nature recovery and the wider environment, through the creation or improvement of habitat. These Strategies will have an instrumental part to play in Local Plan making, with all planning authorities required to have regard to the LNRS. In Kent, the County Council is the Responsible Authority for the development of the Kent & Medway Local Nature Recovery Strategy.

The County Council is also providing strategic leadership for the roll out of mandatory biodiversity net gain, supporting all the planning authorities prepare for its November introduction and ensuring that this new policy realises the potential it presents for delivering genuine benefits for nature.

To meet the demands of this new legislation on Kent's planning authorities, we are significantly expanding the team capacity. There has not been a more exciting time to join Kent County Council's Ecological Advice Service and assist the county not only in development management but a new approach to the delivery of nature recovery, that puts local government right at the heart of action.

Main duties and responsibilities:

1. Provide ecological advice at any stage as requested within the development management process (pre-application, screening, scoping, formal application and enforcement).
2. Assess, and advise on, ecological impacts and appropriateness of any proposed mitigation and biodiversity enhancement measures.

3. Assess, and advise on, biodiversity net gain statements, metric assessments and plans.
4. Represent the service at, and input to, meetings with developers and applicants, planning committees, planning inquiries and appeal hearings.
5. Support the development of local plans, and other strategic planning documents, by ensuring there is consultation of the Local Nature Recovery Strategy, that full consideration is given to areas important for conserving and enhancing biodiversity and that plans enable a more proactive role in environmental recovery.
6. Support the preparation of LPA biodiversity reports, as required by the Environment Act, and identify opportunities for Kent's authorities to support the county's nature recovery action.
7. Provide the County Council's ecological input to strategies, plans, major development proposals and consultations.
8. Act as a point of ecological expertise to county council services, ensuring the authority's work is delivered to best practice standards and meets the requirements of legislation and policy.
9. Provide expert input as required to support the development of county-level strategic documents and action, including the Kent & Medway Local Nature Recovery Strategy.

Footnote: This job description is provided to assist the job holder to know what their main duties are. It may be amended from time to time without change to the level of responsibility appropriate to the grade of post.

Kent County Council
Person Specification: *Biodiversity Officer*

The following outlines the criteria for this post. Applicants who have a disability and who meet the criteria will be shortlisted.

Applicants should describe in their application how they meet these criteria.
