

Kent County Council
Job Description: *Digital Project Manager*

Directorate:	Deputy Chief Executive's Department
Unit/Section:	Technology
Grade:	KSI
Responsible to:	Digital Programme Manager

Purpose of the Job:

The Digital Transformation programme brings together all the major digital change projects in a whole council transformation programme that will prepare us to be ready for the opportunities and challenges ahead. The programme prioritises new and existing digital change programmes that are critical in shaping the digital future of the council. The digital team supports the Digital steering group, working in collaboration with individual programmes to deliver Digital Transformation successfully.

The Digital Project Manager is responsible for leading, managing, and delivering complex digital and technology-enabled change projects, utilising recognised project management methodologies including agile, to ensure that all projects are delivered effectively and under an effective communications strategy, to the required standard within agreed timescales, requiring applied understanding of digital systems, data, and technology-enabled service change.

Main duties and responsibilities:

1. Lead, manage, deliver and evaluate complex digital projects involving technology implementation, system integration, and/or data-driven service change. Projects will be one or more of the following: particularly large in scale, particularly complex, have significant benefits realisation or delivery dependencies, or are core to Digital Transformation and Council's strategic priorities.
2. With the support of the Digital Change Officer, identify and liaise with key stakeholders including technical specialists, suppliers, and service leads to translate business requirements into digital solutions, Ensuring that clarity of roles and responsibilities are determined, and that projects are progressed in line with affordability requirements and overall project timescales.
3. To prepare reports in the required timeframe necessary to obtain approval through governance processes as required. Ability to present project reports

to stakeholder groups as required, promoting clear and effective communication and ensuring high quality outcomes are delivered.

4. To coordinate, review and manage project risks and issues, including technical, integration and data-related risks. To ensure that all risks connected with the delivery of the project are identified alongside strategies and actions to mitigate these risks. Use of RAID logs must be employed.
5. Prepare and present regular management reports at Director, Board and Management Team level to keep them informed of the progress of projects and seek views in relation to resources, service development and timescales, raising concerns and making recommendations to ensure that the Council's services will be fully operational upon completion of the project.
6. Responsibility for managing effective performance review mechanisms to monitor progress and delivery of all projects. Complete all benchmarking requirements accurately and within required timescales.
7. Coordinate and motivate dispersed teams of internal and external providers for specific projects, to ensure that the projects concerned achieve their objectives in line with agreed specifications and timescales.
8. To support multiple project teams adopting a multi-disciplinary approach to finding solutions using lean, agile and design-led methodology to gather insights, prototype solutions and implement creative ideas for change and to ensure that projects are delivered to scope, within budget and to agreed timeframes, prioritising the work that needs to be completed against the capacity and capability of the Digital Programme team.
9. Support the Digital Programme Manager with oversight of delivery planning within individual transformation programmes, ensuring that the Digital plan is reflective of the current state and activity is in line with the Digital Strategy roadmap and informed by technology constraints, architecture, and delivery dependencies.
10. Promotion of Digital Design principles and technology governance and prioritisation models and work with multidisciplinary digital teams (e.g. business analysts, developers, architects, and service designers) to shape and deliver solutions.

Footnote: This job description is provided to assist the job holder to know what their main duties are. It may be amended from time to time without change to the level of responsibility appropriate to the grade of post.
